

Ulysses (Annotated)

Of course, the summary doesn't tell you a whole lot about what the book is really all about. The greatest strength of *Ulysses* is the manner in which it is told. Joyce's startling stream-of-consciousness offers a unique perspective on the events of the day; we see the occurrences from the interior perspective of Bloom, Daedalus and Molly. But Joyce also expands upon the concept of stream of consciousness. His work is an experiment, where he widely and wildly plays with narrative techniques. Some chapters concentrate on a phonic representation of its events; some are mock-historical; one chapter is told in epigrammatic form; another is laid out like a drama. In these flights of style, Joyce directs the story from numerous linguistic as well as psychological points of view. With his revolutionary style, Joyce shakes the foundations of literary realism. After all, aren't there a multiplicity of ways to tell a story? Which way is the right way? Can we fix on any one truthful way to approach the world?
